

All roads cross
in **ROME.**

What better
place to explore
a changing
world?

**BORROMINI
INSTITUTE**

CRITICAL FIELD LEARNING ABROAD

The Borromini Institute is an academic organization which provides educational opportunities for students both in and outside the classroom. Based in the heart of Rome, we support institutions, faculty and independent research programs in Italy and worldwide.

EDUCATING FOR CLIMATE

We share a commitment to educating future leaders, those who will address the broader global challenges of climate crisis, with open minds and hands-on experience.

We recognize the importance of local place-based cultural knowledge and the value of cross-pollination among different perspectives and experiences.

STRONG ROOTS IN FOOD

The Borromini Institute springs from the 20 year history of **Gustolab International**, investigating food systems and sustainability and educating students in food and nutrition studies. Gustolab remains our historic core laboratory.

NEW ACADEMIC CLUSTERS

The **Open City Lab** deals with the built environment, urban place-making, and sustainable architecture, landscape and mobility.

The **Human Rights Lab** teaches courses in globalization, diversity, equity and social justice.

The **Tech Lab** focuses on digital technology, media and design.

We also offer engaging, in-depth courses in **Italian Language and Culture**.
